

# About our Founder

The story of progress and achievement is the story of individuals who have accomplished exemplary deeds by dint of their sheer virtues and sense of purpose.

The life of Dr. V.K Bhatnagar has been a perennial saga of progress, prosperity, hard work and perseverance. He was a man who defied failures and chose to tread the path less trodden, with a mission of bringing solace and enlightening the lives of those less fortunate.

Dr. V.K Bhatnagar visualized education which was useful and meaningful in its basis with aspects attuned to changing times.

He set fresh benchmarks in school education and his endeavors had cast off the cloak of an outdated system in schools whereby teachers never taught beyond the textbooks and the taught never looked beyond the textbooks. He aimed at a generation of students who would stand up to the modern day challenges as responsible members of society.

In his thoughts, as in his action, hon'ble Dr. Bhatnagar had always been ahead of his time. His foresight, his vision and his thoughts of the day easily became the concepts of the morrow. In his own words, "I always think of tomorrow. Today is never a problem, the prime task is the future so we must consolidate our energies towards the demanding future."

**Great things have  
humble beginnings.**

# Director's Message

Dear Parents,

We understand that your child is the epicentre of your life. We assure you that at INSPIRE your child is the prime focus of the faculty.

Our mission is to provide a congenial and safe environment to foster our students holistically into empowered, compassionate and skilled global citizens.

Our focus is well balanced development of every child: physically, intellectually, creatively, emotionally, spiritually and morally.

For continuous enhancement, teacher training programs, array of pedagogical methods, new subjects and latest technologies are regularly introduced. The efficient use of technology in the education sector has changed the face of the industry and paved the way for new opportunities. Schools are now using technology to enhance the learning process and energize the teaching paradigm. It is essential for schools to integrate technology in the classrooms as it helps broaden the student's outlook, makes the process of learning more interesting and simple, and saves the school's time, energy and resources.

In order to bequeath our values and traditions, the school celebrates cultural diversity through patriotic and international days. We strive to have our parents, teachers, and community members actively involved in our students' learning odyssey to evolve as future peace ambassadors, nature lovers and compassionate global citizens.

Let's work together as a team to tap into the infinite potential of eager young minds and help them prosper into balanced and well rounded personalities whose love for knowledge will keep them learning their entire lives.

# Living the Dream

Inspire provides a learning environment that encourages children to bring out the best in themselves and enable their all round development through the joy of learning.

**We at inspire recognize the imperative of imparting an educational experience that is world class in every respect and prepares children as global citizens.**

At Inspire, we believe that the curriculum of excellence with global dimensions is central to the education. We prepare children to face the challenges of the twenty first century with the utmost confidence and strength of character.

Our U.K. based International Early Years Curriculum(IEYC) is a research based curriculum that supports the implementation of our existing curriculum. We strive to provide a comprehensive programme that balances the individual stages of each child's social, emotional, physical and academic development within a child-centered, teacher scaffolded international environment. We aim to foster each child's curiosity, creativity, confidence and independence in order to nurture a love of learning at school, home and throughout their lives.

Our desire is to expose children to a meaningful curriculum of skills, attitude and knowledge through developmentally appropriate activities.

Our children aspire to fulfil their personal potential and have the confidence to achieve their goals. We encourage children to dream and dream big.

### **Insight into the IEYC (International Early Years Curriculum):**

- The unique process of learning shifts the focus from measuring outcomes to driving children's learning and development.
- It is an ideal tool for the transition phase between early and formal education.
- The IEYC covers all the aspects of early years foundation including learning goals and developmental stages.
- Assessment is done using observation and interactions by teachers to achieve a holistic view on a child's development.

**Knowledge is the seed for creation  
and creation is the aspiration of all  
human endeavors.**

# Philosophy

## The Ethics

Built around the philosophy of  
**"Inspiring to seek the Zenith"**

Love what you do and let your passion be your obsession. A clear vision backed by definite plans will give you a tremendous feeling of confidence and personal power. There is no limit to what you can accomplish except the limits you place on your own thinking.

Inspire offers an innovative research based program. The curriculum aspires towards enhancing the desired early childhood skills that lead to strong, mature and happy mind, believing each child to be unique. Inspire works towards exploring the highest potential of each child.

Whether students are developing their academic skills or learning about their surroundings, each lesson is expertly designed to inspire students to reach their full potential.

Building up on our strength of Innovative pedagogy, personalised care and all round development we inspire the process of learning for leaders of tomorrow.

**It is the child who makes the man, and no man exists who was not made by the child he once was.**

# Our Campus

The school campus redefines educational spaces in West Delhi. With an amazing layout of the school, driven by interests of the children, each area is equipped with interesting toys and activities that will inspire every child's imagination and creativity.

Air conditioned classrooms with bright and stimulating decor gives our students a comfortable learning atmosphere that fosters creativity and growth.

At Inspire, children are provided with learning facilities such as well equipped classrooms, computer lab, audio visual room, reading room, art and craft centre, activity space, learning centre, kid's gymnasium, medical centre, an auditorium to express oneself aesthetically.

**The well planned,  
bright and colourful  
interiors invites  
young minds to aspire.**

# Pedagogy

## The Science of Teaching

The early teaching program at Inspire follows the principle of 'Inspiration' to ensure your child has a stimulating and exciting learning experience. We follow the 'Inspiration' method which is largely exploring alternative teaching and learning methods that encourage 'learning by doing' through activities.

Inspire supports a play-based pedagogy. We believe it is through play that children understand each other and make sense of the world around them. At Inspire, balance is created between adult-led and child initiated activities.

Research of neuro-cognitive psychology on the way how brain functions and how learning takes place indicates that learning can be 'facilitated'. With innovative methods, we aspire to inspire the minds of our young children and attempt to make them active thinkers. All the activities are designed taking into account the needs of the children and to ensure development of language, motor and cognitive skills, sensory development, social and emotional thinking and creativity.

**We believe it is through play that children understand each other and make sense of the world around them.**

123 ABC

# We Understand

**All work and no play  
makes Jack a dull boy.**

From playing slides, cars, bouncies, play dough, to abacus and gardening, an array of educational devices are provided to the students to enhance their learning experience.

To facilitate holistic development various activities are integrated in time table as any other subjects integrated in the timetable.

At Inspire, we have facilities for various engaging activities such as:

Gardening

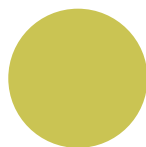

Music and Dance

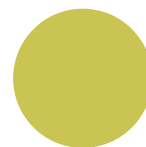

Play time at  
sand pit

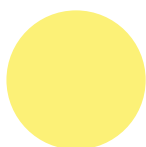

Fun time at  
splash pool

Creative time  
at art and craft  
center

Expressions at  
kids theatre

Mind building  
with indoor  
games

Meditation at  
yoga room

Healthy snack  
making

과학

# Teacher The Facilitator

Inspire has an excellent team of professionals and highly qualified faculty who are determined to enlighten the minds of our children. Passionate, creative and innovative individuals with excellent communication skills, the teachers are partners in the progress of learner and institution at large. Regular updates help them keep pace with the new trends and teaching methodologies like 'Smart Board Technology' and 3-D Lab to aid the learning of children and promote higher order thinking skills.

The entire team of teachers are trained by field work education- IEYC (International Early Years Curriculum), to incorporate the international and modern methods of teaching.

Our teachers aspire towards developing an international curiosity and adding an international dimension to young minds.

**"Behind the child to see where they have been, in front of the child to see where they are going and next to the child in the case they need help."**

## Our mission at Inspire

Is to provide exceptional teaching standards and excellence in all aspects of learning.

# E-Learning A Teacher Aid

In this fast paced world where children interact with modern technology every day, we ensure adequate exposure is provided. We realize the worth of electronically supported learning and teaching. The school aids them with computer studio that has high grade touch screen computers and projectors. Each child is provided with his or her own workstation.

Class rooms are equioed with interactive smartboards which not only enhances their understanding but also helps them maintain an active interest in class.

# Teacher-Student Ratio Personal Attention

It is this hunger for attention and recognition that drives them to do better than the peers, strive harder and reach further. That is why we ensure that every child at Inspire school gets the special attention that he or she deserves and needs. Maintaining a comfortable ratio of 20:1 ensures complete attention to every student so the progress and growth of each child may be monitored closely.

**The need to get noticed and appreciated is the strongest and most apparent in children.**

# A School for Life

## Methodology

The school's approach to teaching is holistic, interactive, learner-centred and progressive. We value pursuit of knowledge and excellence. Our well-planned curriculum produces lifelong learners, creates curiosity for learning, develops interpersonal skills and enhances creative thinking.

Our curriculum challenges students to do their best in accordance with their intellectual, social, developmental, cultural and ethical capacities and needs. It engages children in broadening of their perspective and the deepening of their understanding.

It provides opportunities through discovery. We understand learning is a continuous process, build on variety of disciplines and learning environment. Curriculum is designed taking into account the needs of a child; cognitive, physical, social, emotional and sensorial abilities.

Our curriculum encourages children to push beyond existing frontiers to build upon knowledge, skills and embracing new possibilities for the self.

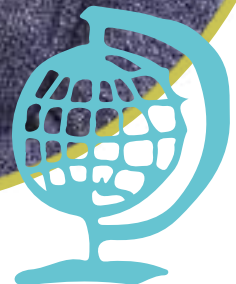

# Mathematics Concept

Numbers are part of our lives from the time we are born. It all starts with a date of birth, goes on to age, then to marks in school and salary figures.

**We at Inspire teach numbers in an enjoyable way.**

We provide children with stimulating experiences in problem solving, number usage and practical applications of numerical concepts. With such a learning experience, we encourage children to explore, investigate and understand the usage of mathematics and other mathematical concepts in an interactive and practical manner.

$$1 + 2 = 3$$

# Field Trips

As we take a trip down memory lane, we probably identify holidays or excursion as the most remembered days of our lives. All work and no play definitely makes our life dull. We understand the value of having fun and we work towards making learning a more hands-on experience as opposed to a hands-off academic chore. Inspire school facilitates children to learn by seeing, feeling and doing.

**Excursions  
are combined  
with seeing  
and doing-vital  
components of  
early education  
program.**

**Through these experiences,  
children learn to establish their  
understanding as well as acquire  
social, intellectual and physical  
skills necessary for the development  
of meaningful concepts.**

# Child Care Child Psychologist

It requires a lot of sensitivity and compassion to understand what goes on in a child's mind. Children often feel uncomfortable about speaking out their minds openly, for the fear of being judged. To address the child's special needs, we have a professional child psychologist to help the children deal with age related concerns.

Ranging from lack of concentration, mood swings to differences with siblings and friends, the problems and their solutions vary. The child psychologist works in close co-operation with teachers to ensure that the students gain emotional maturity and are better able to handle themselves in all situations and are able to enjoy happy and fulfilling days at home and at school.

# Child Wellness Center

For children who may feel under the weather, we have a special medical room. A qualified nurse, who is well capable of comforting the child and conducting first aid, with this special attention your child will feel comfortable till it is time to go home. For medical emergencies we have tied up with super speciality hospitals in the vicinity.

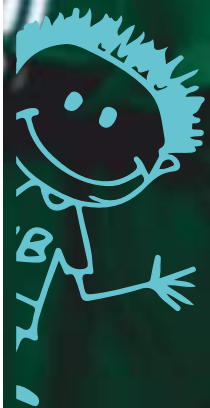

Along with physical wellbeing, emphasis is also laid on spiritual wellbeing.

Yoga promotes awakening of the inner self, embodies unity of mind and body and enhances flexibility and coordination amongst children.

Care and respect for  
each other is a way  
of life at Inspire.

# Safety and Security

The safety and security of your child is as important to us, as it is to you. Therefore, we ensure that the highest standards of child safety are met. To aid us in securing the child's safety, we have security personnel all over the campus to ensure that unwanted people do not enter the school. These guards are specially trained and geared for school security. We also have 24 hour surveillance of CCTVs installed all over the campus. The installation has been done in all crucial areas like all entries, exits and corridors. In addition to this we have fire-fighting equipments. To ensure that our students are not affected by the harmful air pollutants, air purifiers have been installed in the classrooms.

Our children feel happy and safe - there is an atmosphere of mutual trust and respect.

Bullying, harassment and prejudice of any kind is not tolerated. There is a positive culture that supports good learning, play, friendship, understanding and tolerance. Children accept diversity.

Our children can make informed decisions about how to keep themselves safe.

**We provide a safe, clean and healthy environment that is conducive to exemplary learning**

# Theater

To keep up with our philosophy of the overall development of the child, we give due emphasis to be creative. To nurture the budding talent, we have specially designed activities for all kinds of theatre and dance forms. This is where the rising stars of tomorrow will be able to hone their talent and perform. Dance, music and theatre serve as a means to achieve excellent motor, language and presentation skills. The sense of accomplishment and confidence building is a big highlight of these activities.

# Sports and Extra Curriculum

Health is wealth. To enjoy a healthy life on a daily basis, we ensure that our students get ample fresh air and exercise as they participate in martial arts, skating, table tennis and yoga. A healthy body houses a healthy brain. For achieving this we have employed professional coaches and designed specific training programs to expose the students to a wide array of physical activities. We take great pride in the sporting skills and spirit of students.

# We Believe...

The early years of life are important in their own right. Children should be supported to learn and develop at their own unique pace.

Play is an essential aspect of learning and development. Learning happens when developmentally appropriate, teacher scaffolded and child initiated activities harness children's natural curiosity in an enabling environment.

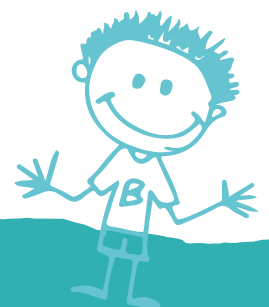

Independent and interdependent learning creates a context for personal development and is the foundation of international mindedness.

Knowledge and skills development lead to an increasing sense of understanding when children are provided with opportunities to explore and express their ideas in multiple ways.

Learning should be motivating, engaging and fun, opening up the world of wonders for children where individual interests can flourish

**We believe application of creative and out of the box thinking will create thoughtful leaders of tomorrow.**

Learning  
happens  
beyond the  
classrooms  
and  
textbooks.

# Program

## Nurturing the Bond

Mother – Toddler

Age Group – 1 Year +

Duration : 90 minutes and thrice a week

Emotional Development

Social Development

Physical Development

Language Skills  
Development

Toddler explores the world around them using their sense organs, leading to the process of discovery, probing, connecting and understanding. In this journey of curiosity a toddler's intelligence begins to evolve. Inspire provides a safe and secure environment that nurtures toddlers senses and stimulates his imagination as we at Inspire know that fostering imagination in early years lead to stronger creativity later in life.

Play is important for the overall growth of a child in terms of his brain development, physical development, social and emotional growth.

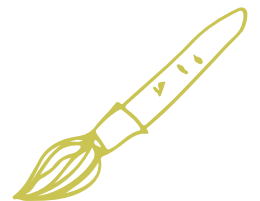

First few years of a child sets a strong base for a lifetime. Our early learning program encourages the toddler to explore his environment and interact with peers and adults in his own comfort zone. Activities are carefully designed with developmentally appropriate learning centre and material. We encourage self expression and exploration while building a strong foundation

Mother toddler program acts as a transition bridge and aims to help children to become independent and overcome separation anxiety, as well as achieving their early year milestones.

Inspired by the best practices of IEYC and Maria Montessori, we have developed a compressive, dynamic and contemporary curriculum that prepares our young ones to go through the journey of life with complete confidence.

Our mother toddler program is also designed to support the need of a young parent. A safe and secure environment where a toddler is intrigued to learn and thrive and as a parent you have the opportunity to celebrate their milestones and share your experience with other young parents.

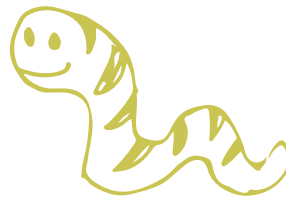

**We kindle a love  
for learning with  
research based play  
program.**

# Play Group

Age Group - 2 year +

Young children experience and explore the world through all their senses. Children have very sensitive sense of touch, warmth and well being. Our teachers at Inspire, seek to create a learning environment that nurtures child's imagination and senses and provide plenty of repetition. Young children learn best through imitation and repetition.

Stimulating children's senses in an intentional yet gentle manner creates calm and encouraging setting for learning. Our early childhood foundation will equip a child to flourish in an academic environment.

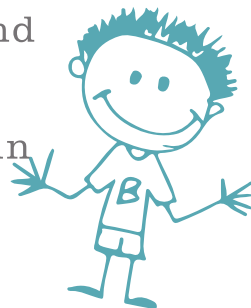

# Nursery

Age Group - 3 year +

The comprehensive style of curriculum is designed to produce young adults who are creative thinkers, intellectual risk takers and engaged citizens.

Students are prepared to encounter the challenges of the world around them with creativity, flexibility and self awareness. We consider young children to be individuals who are curious about the world and have the powerful potential to learn from all that surrounds them. Educational, psychological and sociological influences are important factors to consider in understanding children and working to stimulate learning in appropriate ways.

**At Inspire  
children are  
exposed to  
wide variety  
of educational  
opportunities  
that encourage  
self expression,  
communication,  
logical thinking  
and problem  
solving skills.**
