Education Evolution by Blue Bells

# Mission

To play a pivotal role in the positive development of the cognitive, emotional, social and physical faculties of our students.  
To provide a safe, compassionate, collaborative and stimulating ecosystem that will help our children emerge as balanced individuals with higher aspirations, and enable them to discover their true potential.

# Vision

To combine our rich heritage and human capital with emerging global best practices in education to create and foster an environment of excellence in learning.

# From the Helm

Education must evolve. This is our shared responsibility. School education has come of age. From being facilitators of literacy in the industrial age, schools today are institutions meant to develop the overall personality of a child.

Education methodologies have greatly benefited from research in child psychology. The big leap in school education stems from research that has been done on how a child learns. The biggest paradigm shift in education has been to teach students through ways and means that are in alignment with the ways in which they learn. The traditional approach to teaching has been an instructional one. Advances and insights into behavioural sciences have revealed that learning happens not through instructional teaching only, but by other means as well.

At Blue Bells, we searched far and wide to understand these methods. We discovered many new approaches to learning such as experiential learning, learning through multiple intelligences, inquiry-based approach, phenomenon-based learning, constructivist approach and more.

EXPLORE · LEARN · EVOLVE

Our curriculum development experts have leveraged on multiple approaches to create a singular learning approach that combines western science with insights from Indian philosophy.

Additionally, research has shown that students learn and develop complex thinking skills by cutting across subjects and emulating real life situations in a collaborative environment. Emotional safety, empathy and compassion are essential not only for socio-emotional growth but also facilitate creativity and deeper understanding to help create an integrated learning environment.

Our new school, The Blue Bells School for Integrated Learning, therefore offers our most contemporary learning environment yet.

# All that a school ought to be. And more.

The Blue Bells School for Integrated Learning is an initiative of The Blue Bells Group of Schools, a premier school education provider in Gurugram.

After four decades of exploring and practising progressive methodologies from around the world, The Blue Bells School has created a unique approach to learning and child development.

It has combined these learning methods with robust programmes that focus on the physical, intellectual, social and emotional well-being of each child.

The school has looked at multiple aspects in its pursuit to create an ideal learning environment. Each classroom

is designed to adapt to different tasks and community areas designed to encourage teamwork across age groups.

The new 5-acre campus opens soon in Sector 50, Gurugram, in a LEED-certified platinum-rated green building.

Admission is currently open for the session starting April 2020 for Grades 1-5.

The school will be upgraded to 10+2 with affiliation to CBSE.

# Education Evolution by Blue Bells

A unique developmental approach based on 5 pillars

## Progressive curriculum

Quality education brought about by drawing upon globally acclaimed, contemporary teaching methodologies rooted in constructivism and a range of learning theories and behavioural sciences.

## Programs for socio-emotional well-being

Health and wellness initiatives that address core issues faced by children and seek to further their holistic development, while promoting internal and external harmony.

## Advanced sports infrastructure

Safe, well-equipped spaces designed for optimal physical development and an inculcation of team spirit, which students can 'own' and yet where they can be watched over.

## Scientifically informed facility design

Learning spaces that encourage intellectual stimulation and creativity and where concepts are made tangible through multiple sensory and cognitive experiences.

## 40-year foundation of strong values

A base that helps build and strengthen intrinsic life skills of children to enable them to emerge as intellectually, emotionally and ethically strong citizens.
