LETTER

Dear Parents,

Greetings from Nalapad academy!

Nalapad Academy was built with a vision to create a successful gen-next, which is well equipped with technology and a high emotional quotient, therefore emerging as globally recognised future leaders.

Centrally located in the heart of the city, Nalapad Academy becomes an optimal choice for cutting down travel time and saving the child from prolonged exposure to harmful pollutants in the environment. **Healthy mind and healthy body ensure energetic days of blissful learning.**

We, at Nalapad Academy postulate in providing global experience while staying rooted in our culturally rich local philosophies. We firmly believe in the concept of "Think Globally Act Locally*.

We have put in unmatched numerous efforts to give the students a highly secure learning space, where they are nurtured and mentored carefully towards successful endeavours. They are provided with **State of the art infrastructure**, experienced faculty members, apple enabled classrooms, differentiated concept based and experiential learning, sports academy and nutrition rich diet that is monitored by the faculty and parents are updated through our ERP. All transport is provided with seat belt on each seat and GPS enabled tracking.

We have it all planned, with a lot of care, for your precious children. We not only nurture hope but also your child's future!

Our team will be delighted to walk you through our state of the art campus & put all your queries, about our school, to rest.

Looking forward to having you as a part of the ever growing Nalapad family!

Warm regards, Team Nalapad

OUR PHILOSOPHY

OUR ESSENCE

VISION

Our vision is to create empathetic leaders through our holistic and innovative approach & to nurture them into persistent learners who contribute globally.

MISSION

Our mission is to nurture global citizens through a stimulating learning environment that encourages to imbibe the core values of honesty, integrity, creativity and empathy.

OUR LEADERS

DR. NA MOHAMMED

CHAIRMAN

MR. NA HARIS FOUNDER & DIRECTOR

MR. OMAR HARIS NALAPAD
DIRECTOR

TECHNE OGY

The world has witnessed a rapid shift from industrial era into the digital era. Technology has taken over the working as well as life style of humans. It is here to stay! Fortunately our present generation of students are born natives to technology. We, at Nalapad academy introduced technology in the classrooms to help them stay savvy with the latest changing & emerging trends globally, as well as assisting them in understanding how to use it to their benefit for success all the way up.

Apple-Smart Classrooms

Inducing the international trend in our system, classrooms are completely apple enabled to ensure learning with technology, thus helping students retain the knowledge in an experiential way. Fully secured iPads will be handed to students grade 3 onwards, to help them utilize it for research and innovation.

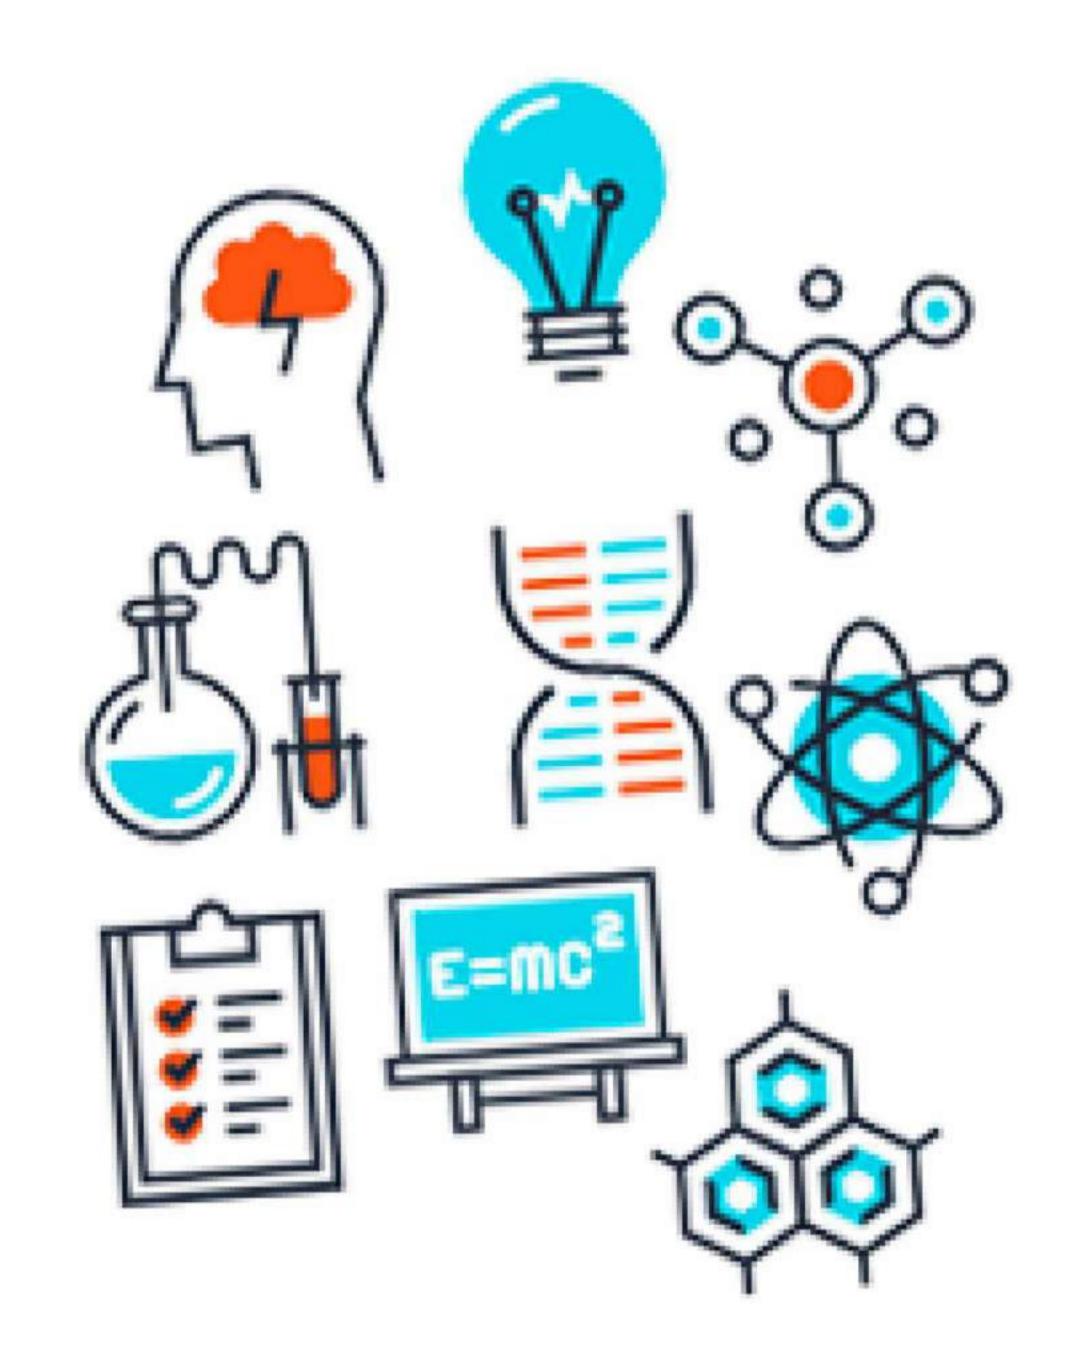

Integrated Robotics

In Nalapad Academy we do not believe in extra curriculum, that's why important developmental aspect such as Robotics is fully integrated with our computer curriculum. Starting from the basics and going up to the level of international hackathon/robocup competition, we have it all in place for your child to shine bright on the global platform.

Research and Innovation

We believe in early introduction into the world of research and creativity laced with critical thinking. Students are from the very early years trained to explore new ideas, research on various topics and subjects. They are trained to understand the 5W and 1H theory of what, when, why, who, where and how. This is done to train the young brains towards innovative ideas and the execution of the same, thus ensuring an entrepreneurial approach in learning that will help them in a successful future.

OUR ACADEMIC APPROACH

We, at Nalapad Academy understand that every child is born with different learning abilities. Every child has specific modalities of intelligence & not just a single dominated general ability to obtain grades. This is the reason we created a **student centric curriculum** to ensure knowledge being retained in the best ways possible. Emphasis is more on learning and absorbing the subject rather than primarily focusing on grades. **Tapping the true potential of the child is the Real Hero** and a game changer in the student's formative years to help them build self-esteem, in turn helping them become strong leaders.

Experiential Learning

Hands on experience is the key factor in the student centric learning approach. While this helps the student to understand the subject in depth, it also ensures engagement in critical thinking, problem solving, decision making and other relevant life skills essential to lead a successful life in future.

Concept based Learning

Concept is a way to make sense of anything a student learns. Therefore, concept based learning is a tested framework to learn everything.

The world is changing & evolving at a rapid pace and so is everything we consider true knowledge. The ability to view the world with a more flexible & adaptable mind is priceless. Unlike content based education that focuses only on certain preconceived facts, concept based education focuses on how to make sense of the facts. Content can change, concepts stay the same. **Information is useless, unless you can do something with it.**

Differentiated Learning

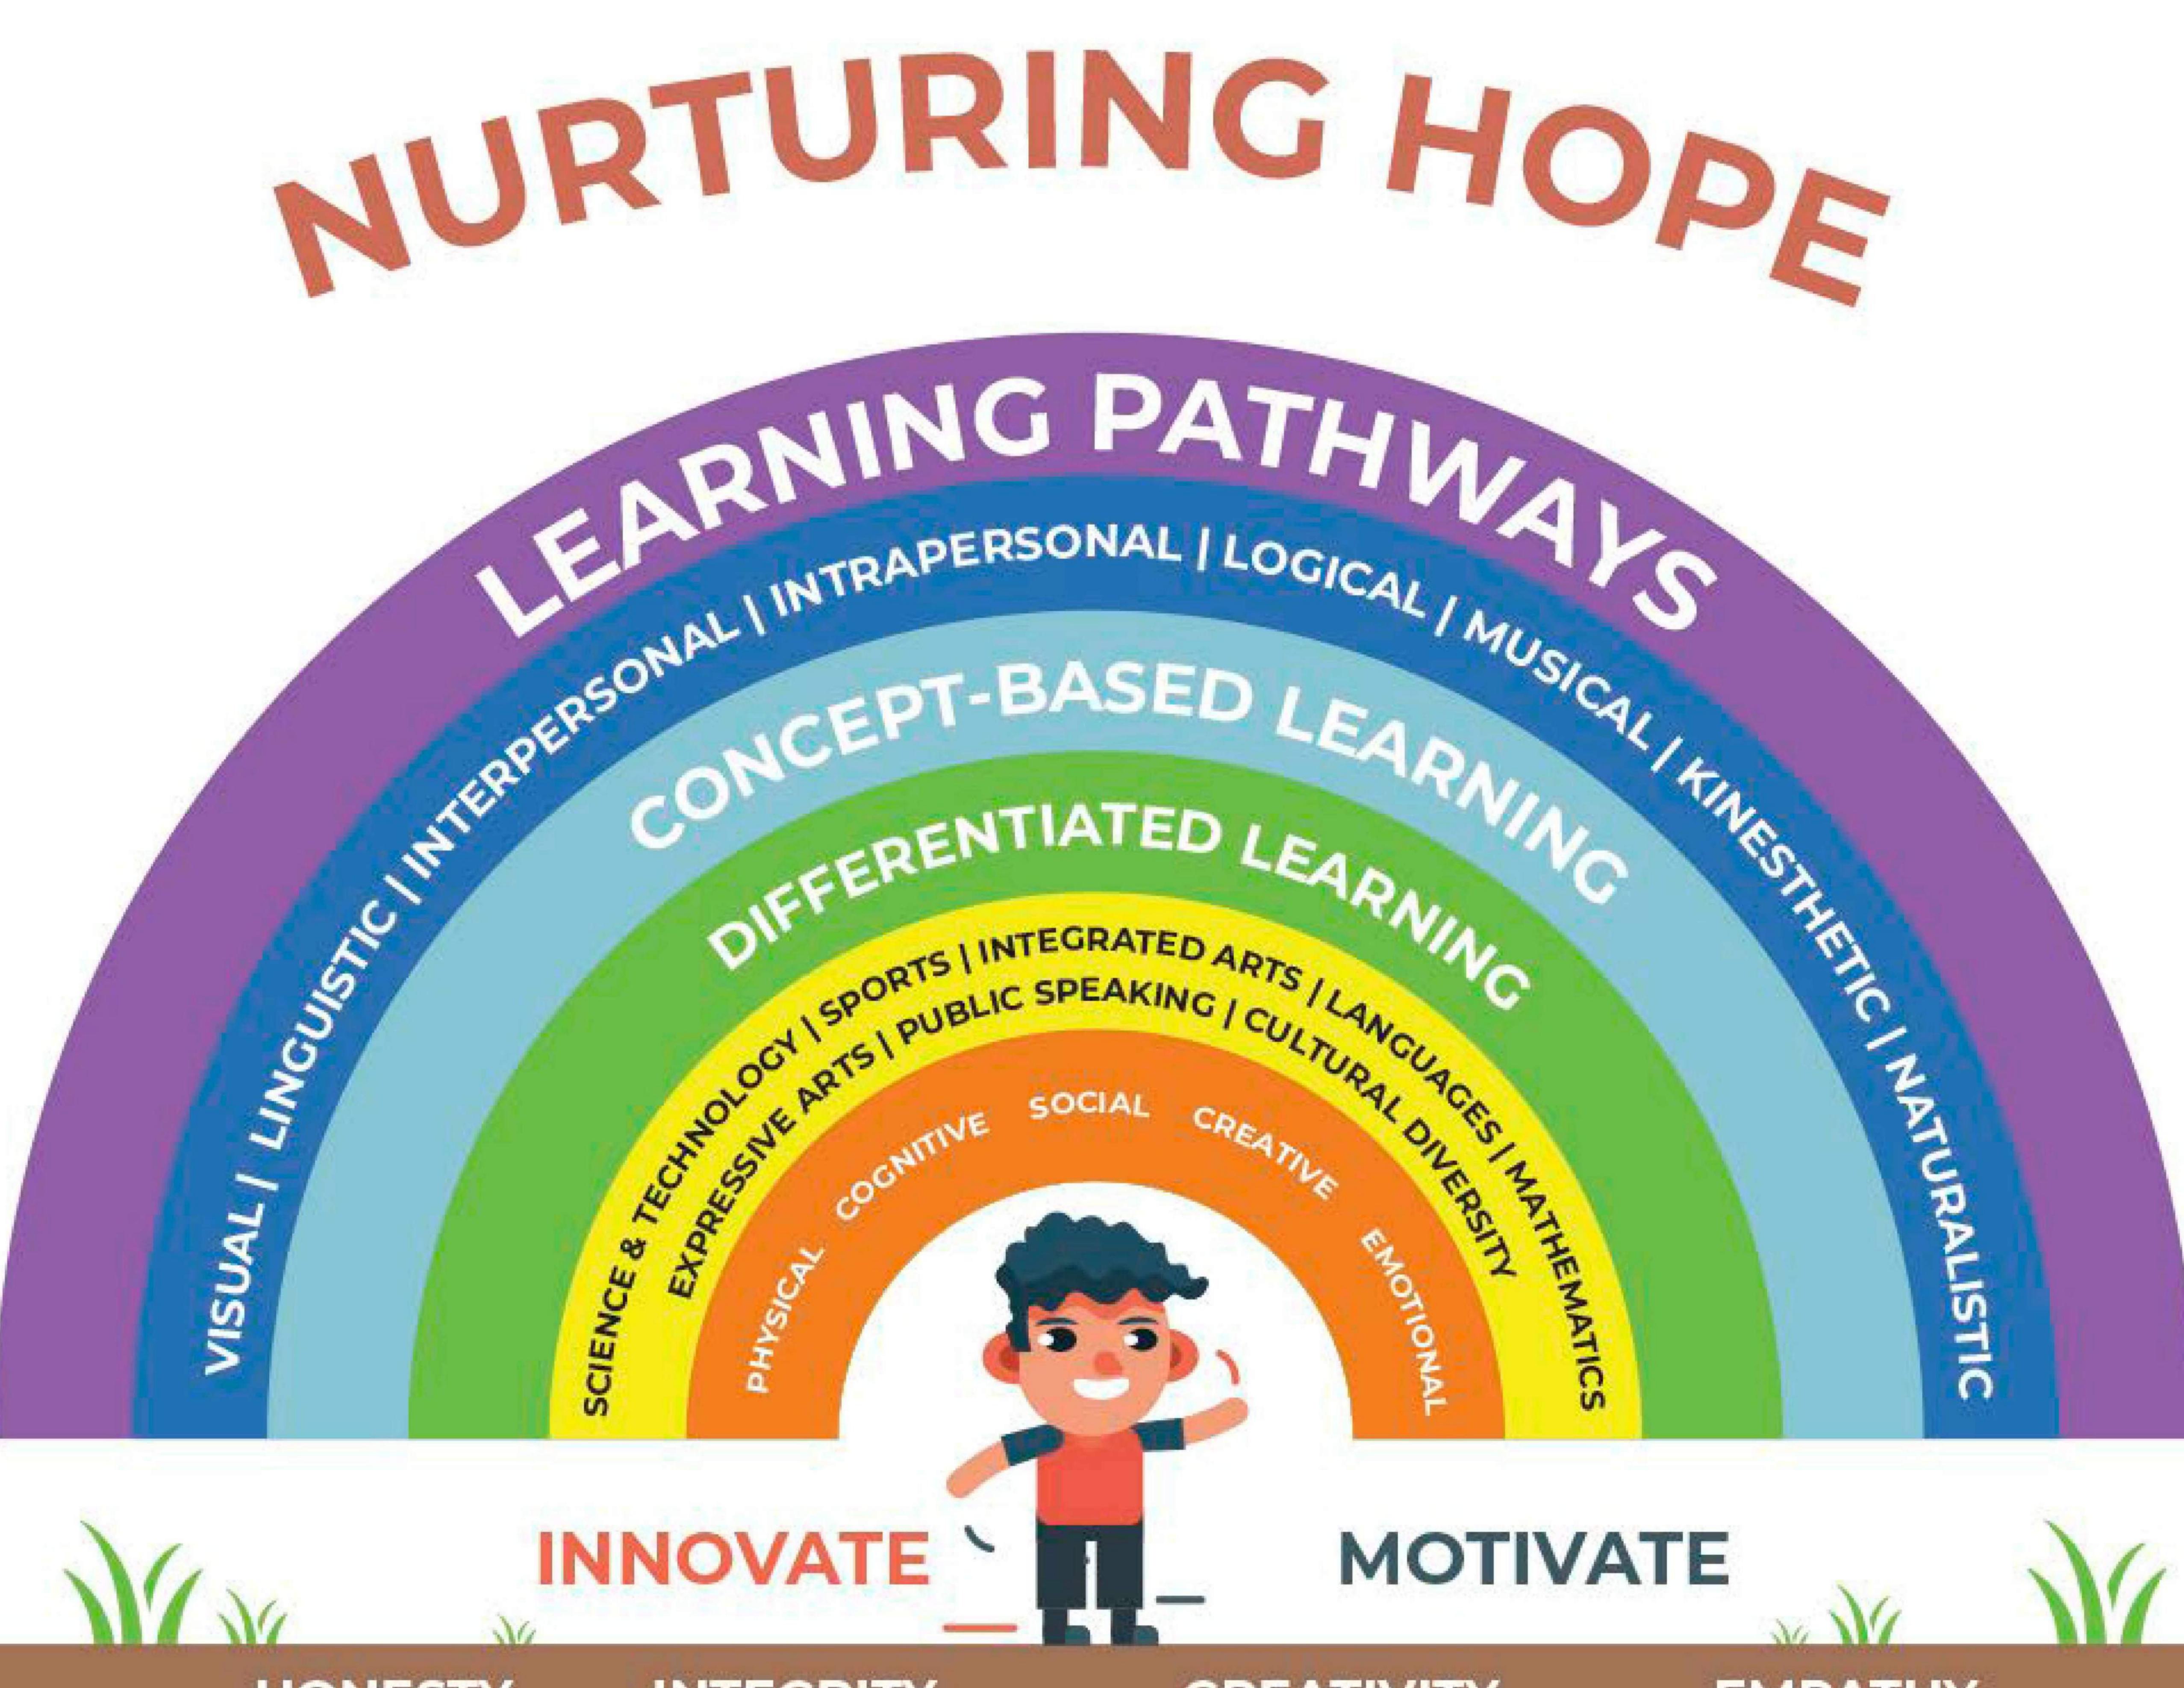

Students do not adapt to lessons, our teaching & lessons adapt to our students!

Every student's needs are equally valued and equally served. Differentiated instruction is an approach that does just this. As a policy, we follow the theory of multiple intelligences and firmly believe that each student has the ability to learn all subjects differently. Our job as educators is to provide support during this learning process.

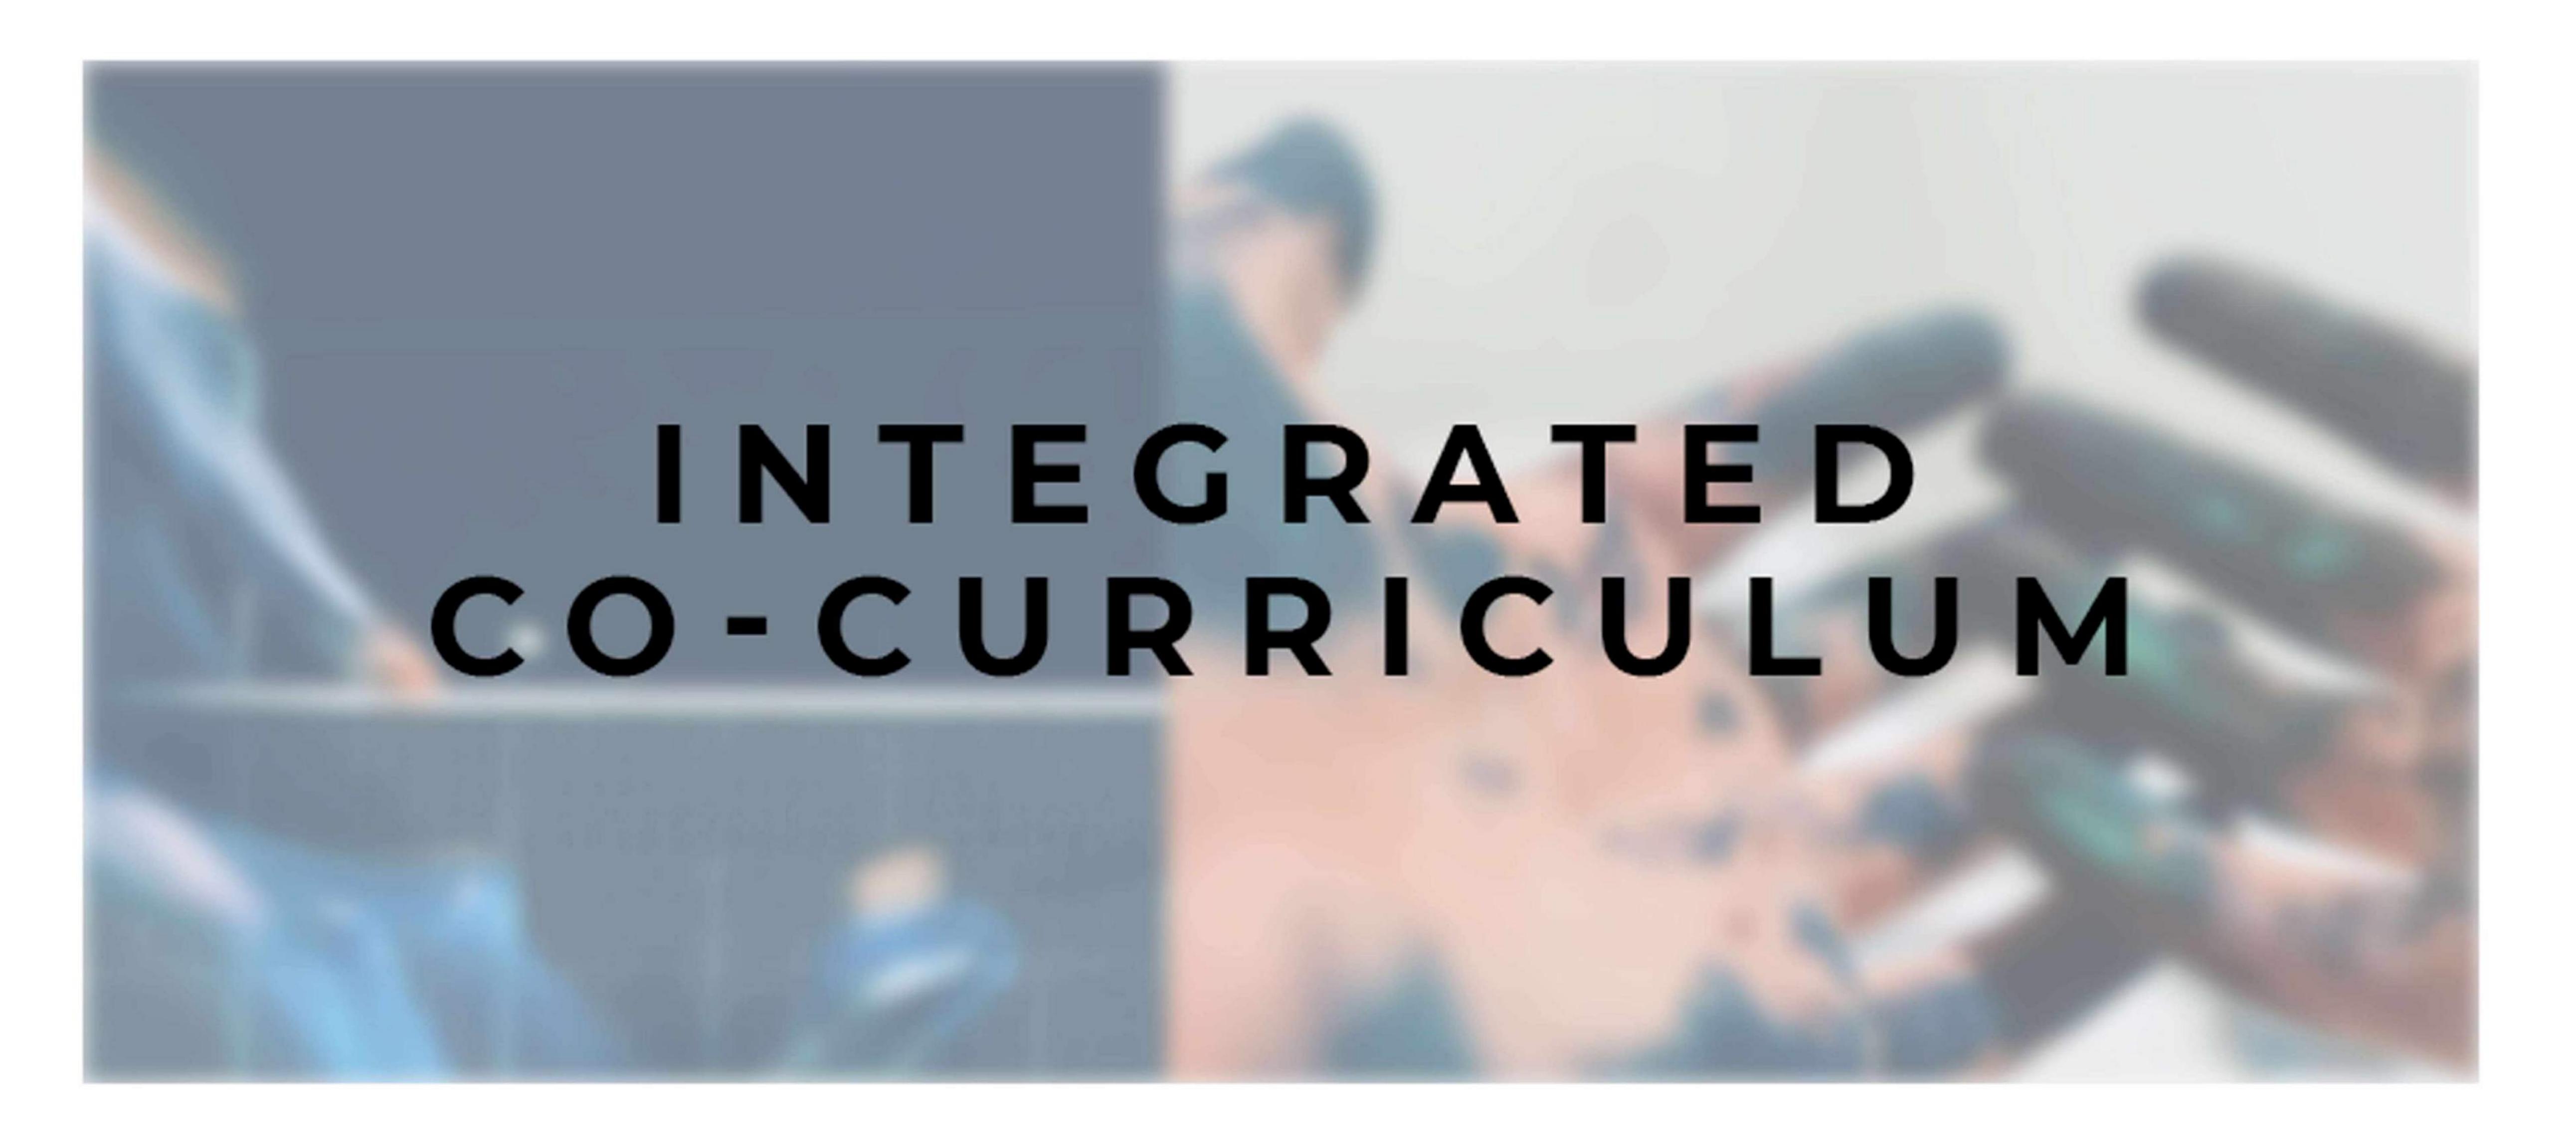

Mentorship program

We handhold every child with our specially designed mentorship program at three stages

- 3 year mentor rotation for monitoring the overall growth of the child
- Emotional and career counselling for ensuring a stress free learning
- Placement counselling for future academic growth in various international and national colleges and institutions.

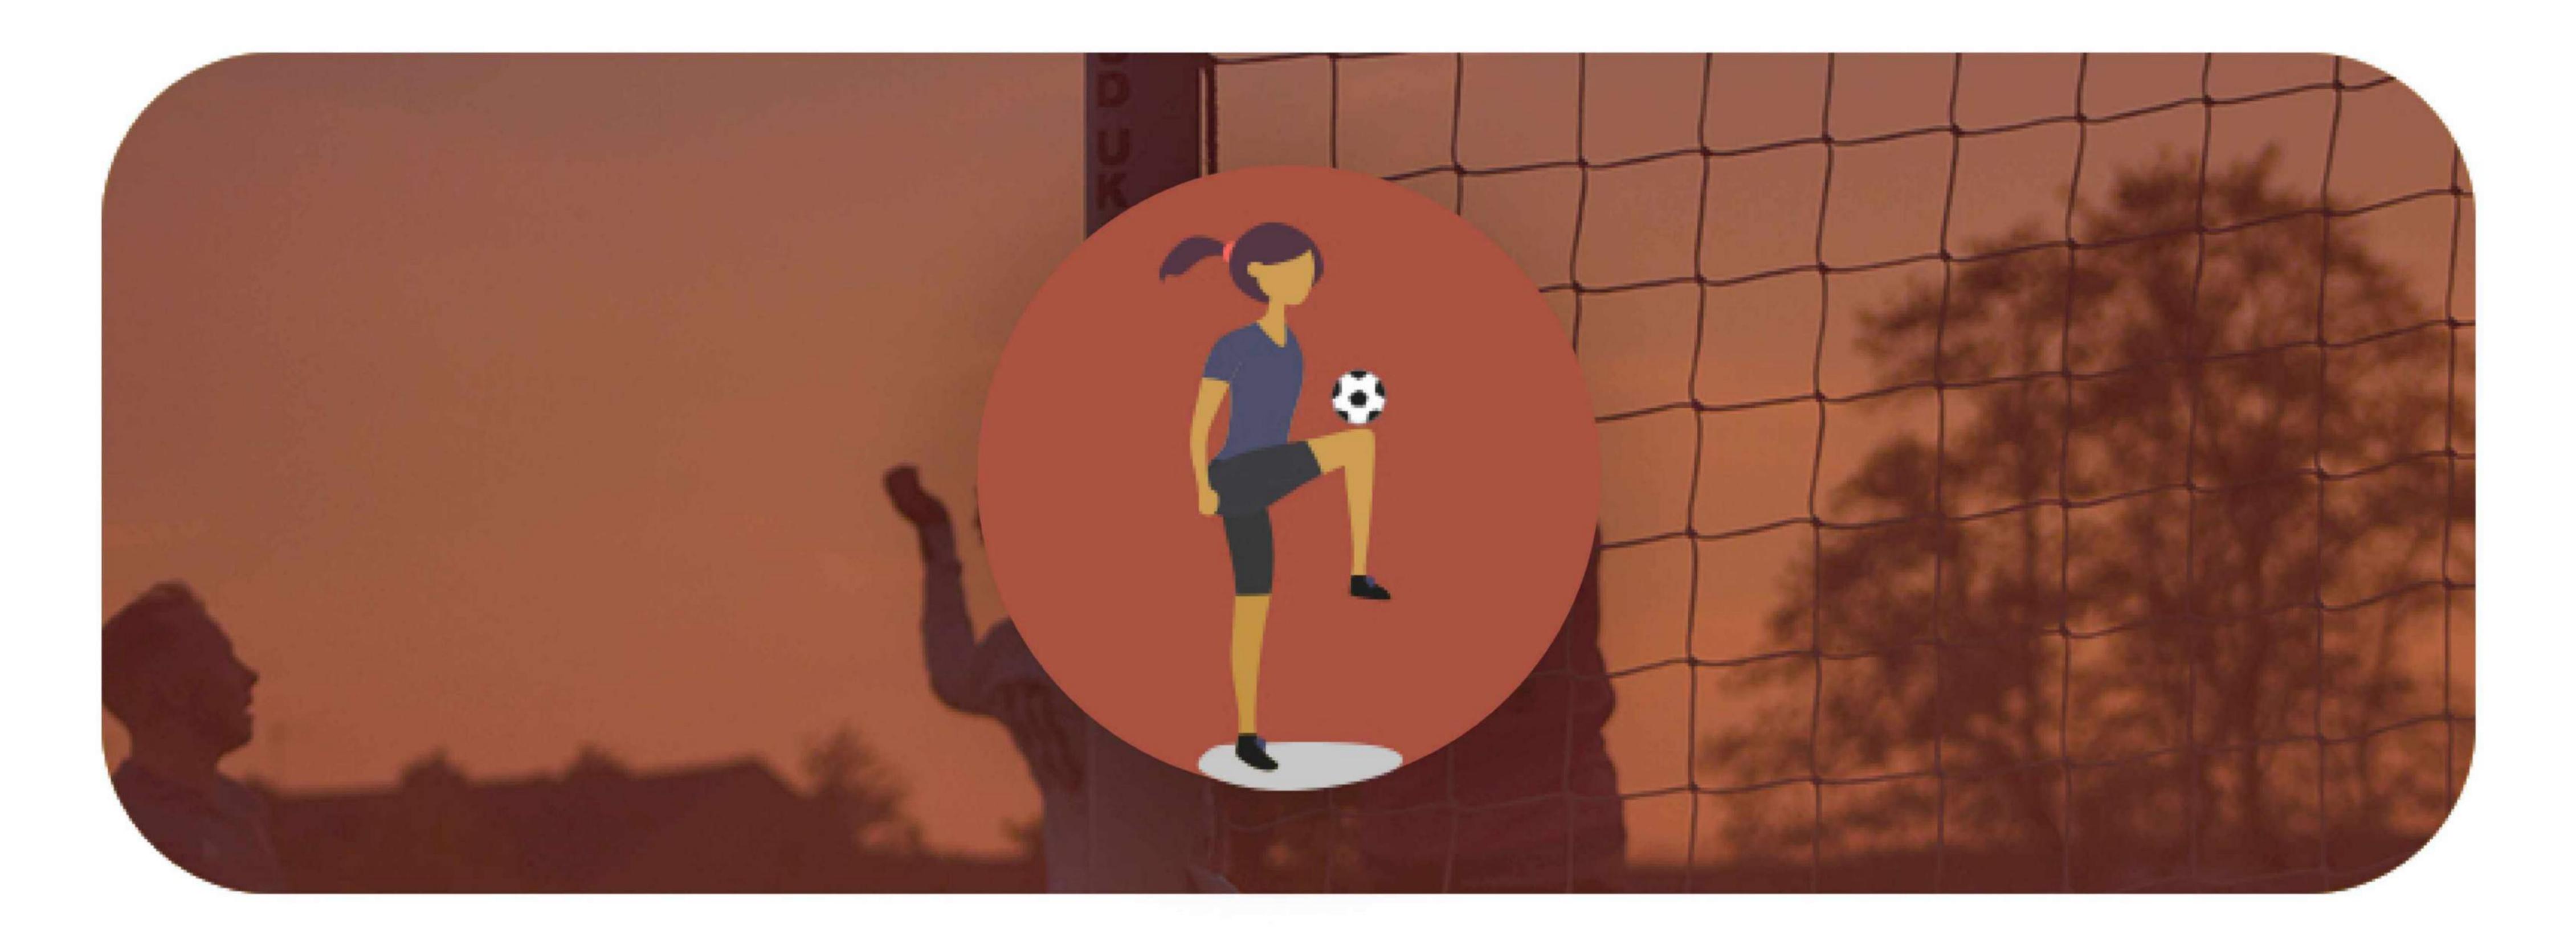

HONESTY INTEGRITY CREATIVITY EMPATHY

Co-curricular activities are integral to forming a child's personality and character. Identifying the importance of the same, Nalapad Academy has dedicated an expansive area for recognizing and mentoring our students in the areas of Art and Craft, Dance and Music, Performing Arts and Sports.

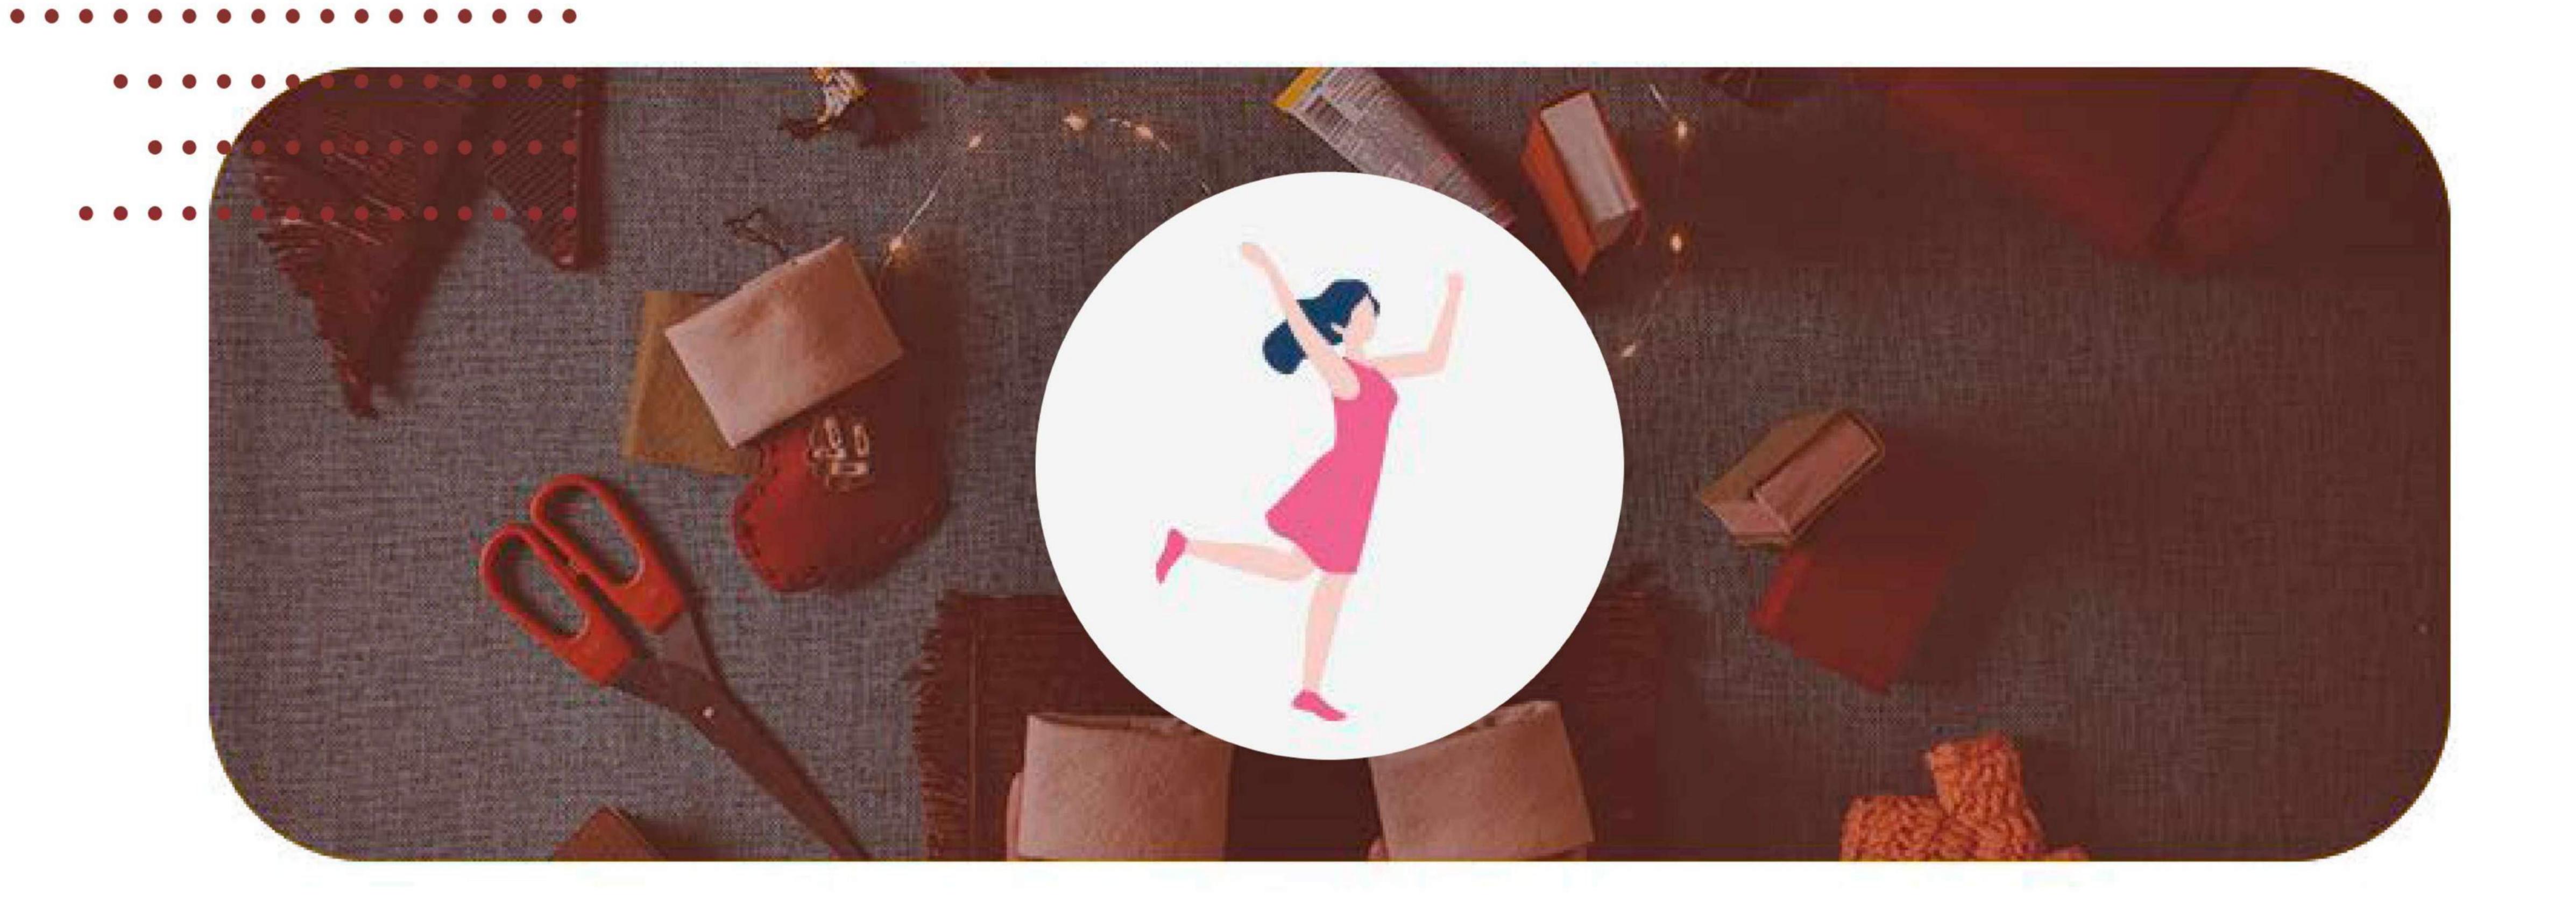

At Nalapad Academy we have integrated the co-curriculum as a part of the main curriculum, thus giving in-depth knowledge and experience in the subjects with equal importance as other subjects.

Sports

Sports is an important part of a growing child's emotional and physical development, that's the reason at Nalapad Academy it's mandatory for a student to take up yoga, martial arts and any one sport of their choice along with the two mentioned activities.

Our campus is well-equipped with several sports facilities - both indoor and outdoor. For indoor sports, we train our students in chess, table tennis, boxing, yoga, squash, martial arts, shooting and archery. We pride ourselves in our state-of-the-art arenas and courts for basketball, football, volleyball, cricket and badminton. Our temperature-controlled half Olympic-sized swimming pool is an ideal fit for children who have dreams of becoming the next Michael Phelps!

Visual Arts

With us a child's imagination is allowed to flow freely to create innovative and interesting things. To facilitate this, we have specialised zones dedicated for visual arts enhancement. They are inspired to enhance their creative skills and develop artworks such as paintings, pottery, murals and installations.

Performing Arts

This academy forms an essential part in enhancing the overall learning experiences for our students. Research shows that performing arts, especially dance and music help develop and stimulate brain functions. We let our students create their own success stories through their inherent talents. We train our students in different styles of dance and genres of music, developing a multi-pronged approach for both forms of art by partnering with several reputed dance and music academies. Drama, as an art form, helps the students to think, create and express in a better way. Through it, we effectively encourage creative and divergent thinking, problem-solving abilities as well as social & interpersonal communication skills in our students. Our students are also given the opportunity to display their talents in several platforms.

Community Service

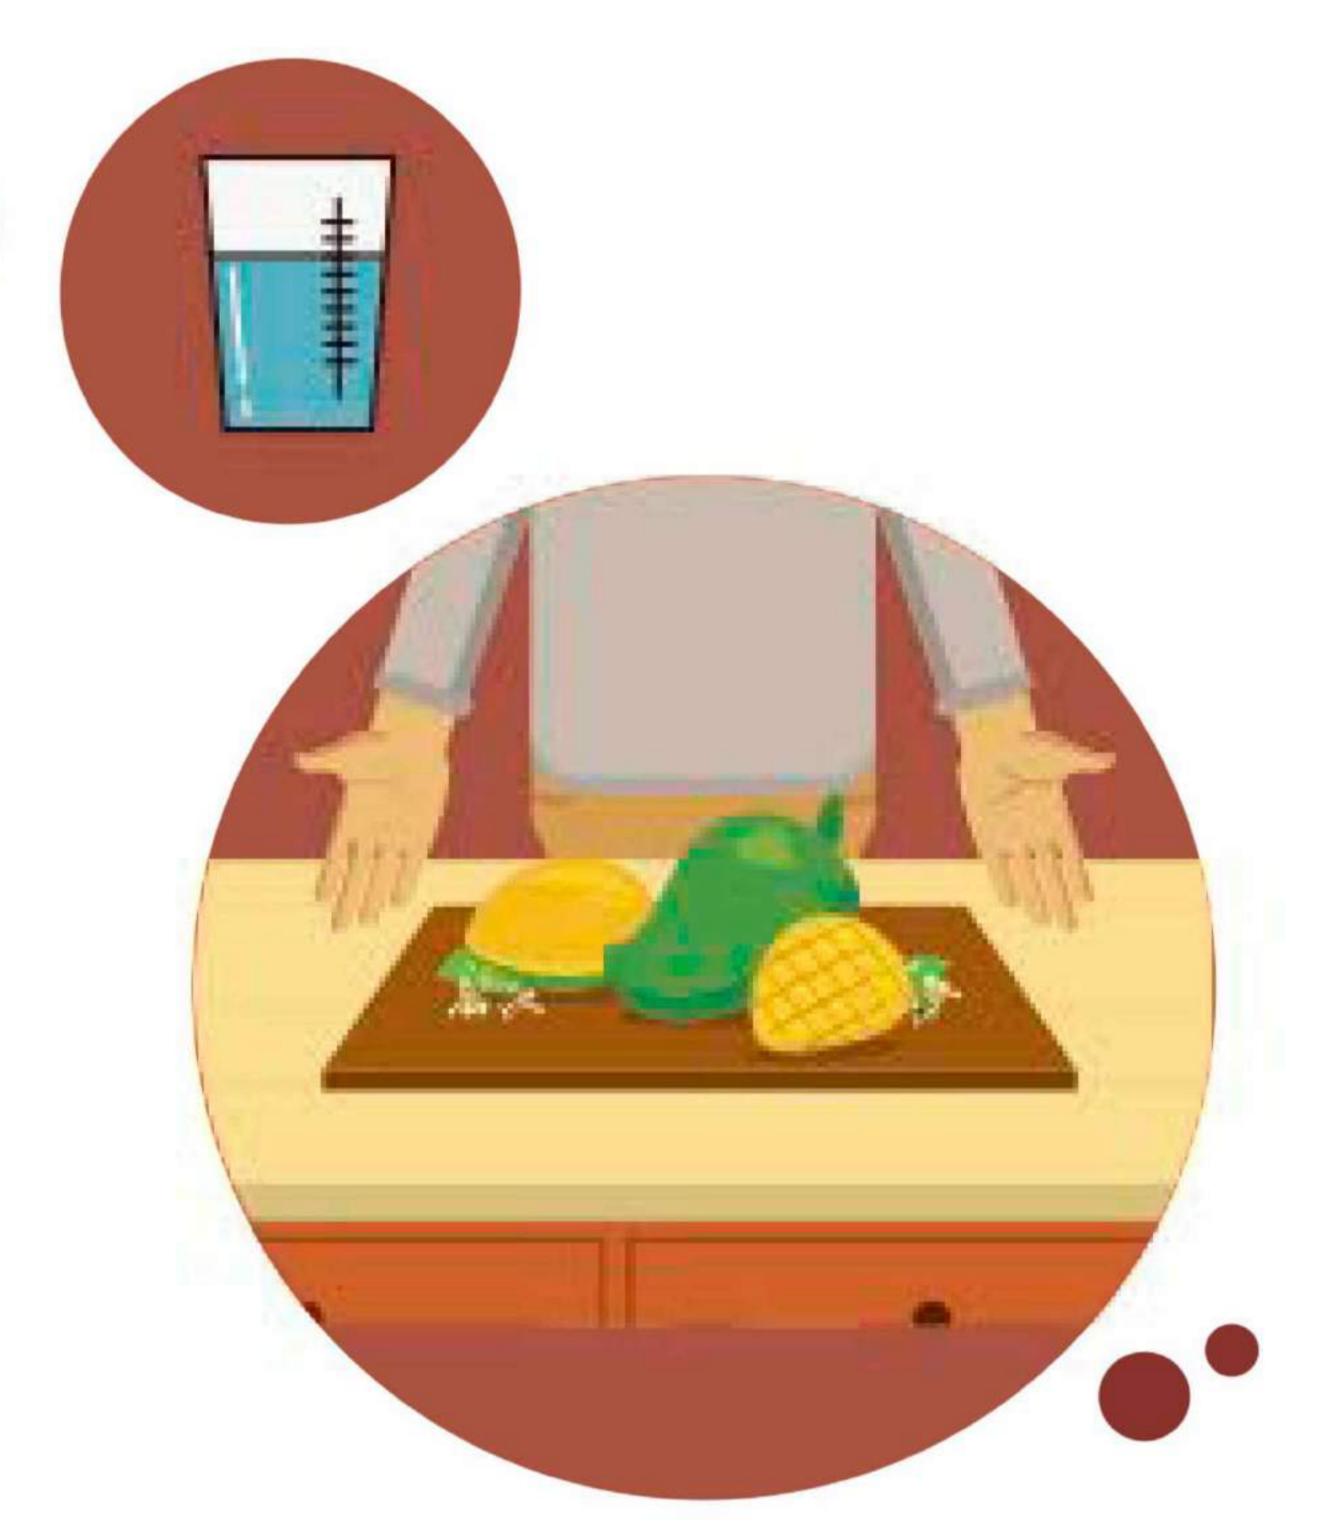

Inculcating a sensitive attitude towards the needy and working towards their upliftment is an important part of growing as an individual. Our students and faculty are involved in community service from the very beginning both within the city as well as in a rural environment. This aspect of our program fosters a sense of compassion and empathy among the little ones as well as keeps them grounded to their roots.

HEALTH & SAFETY

Nutrition

Our food choices each day affect our health — how we feel today, tomorrow, and in the future. Good nutrition is an important part of leading a healthy lifestyle. Combined with physical activity, our diet can help us reach and maintain a healthy weight, reduce our risk of chronic diseases and promote overall health.

Our well-equipped cafeteria has healthy and balanced meals crafted by our nutritionists and expert chefs who will ensure that your child's diet is nourishing & fulfilling.

Infirmary & Healthcare

Our well-equipped healthcare centre with experienced doctors and medical assistants are always handy to take care of your child's well-being for both regular check-ups and emergency situations.

Security

Premise is fully equipped with extreme coverage cctv. Our vertical approach also ensures a complete control over the student activities throughout the day in the academy.

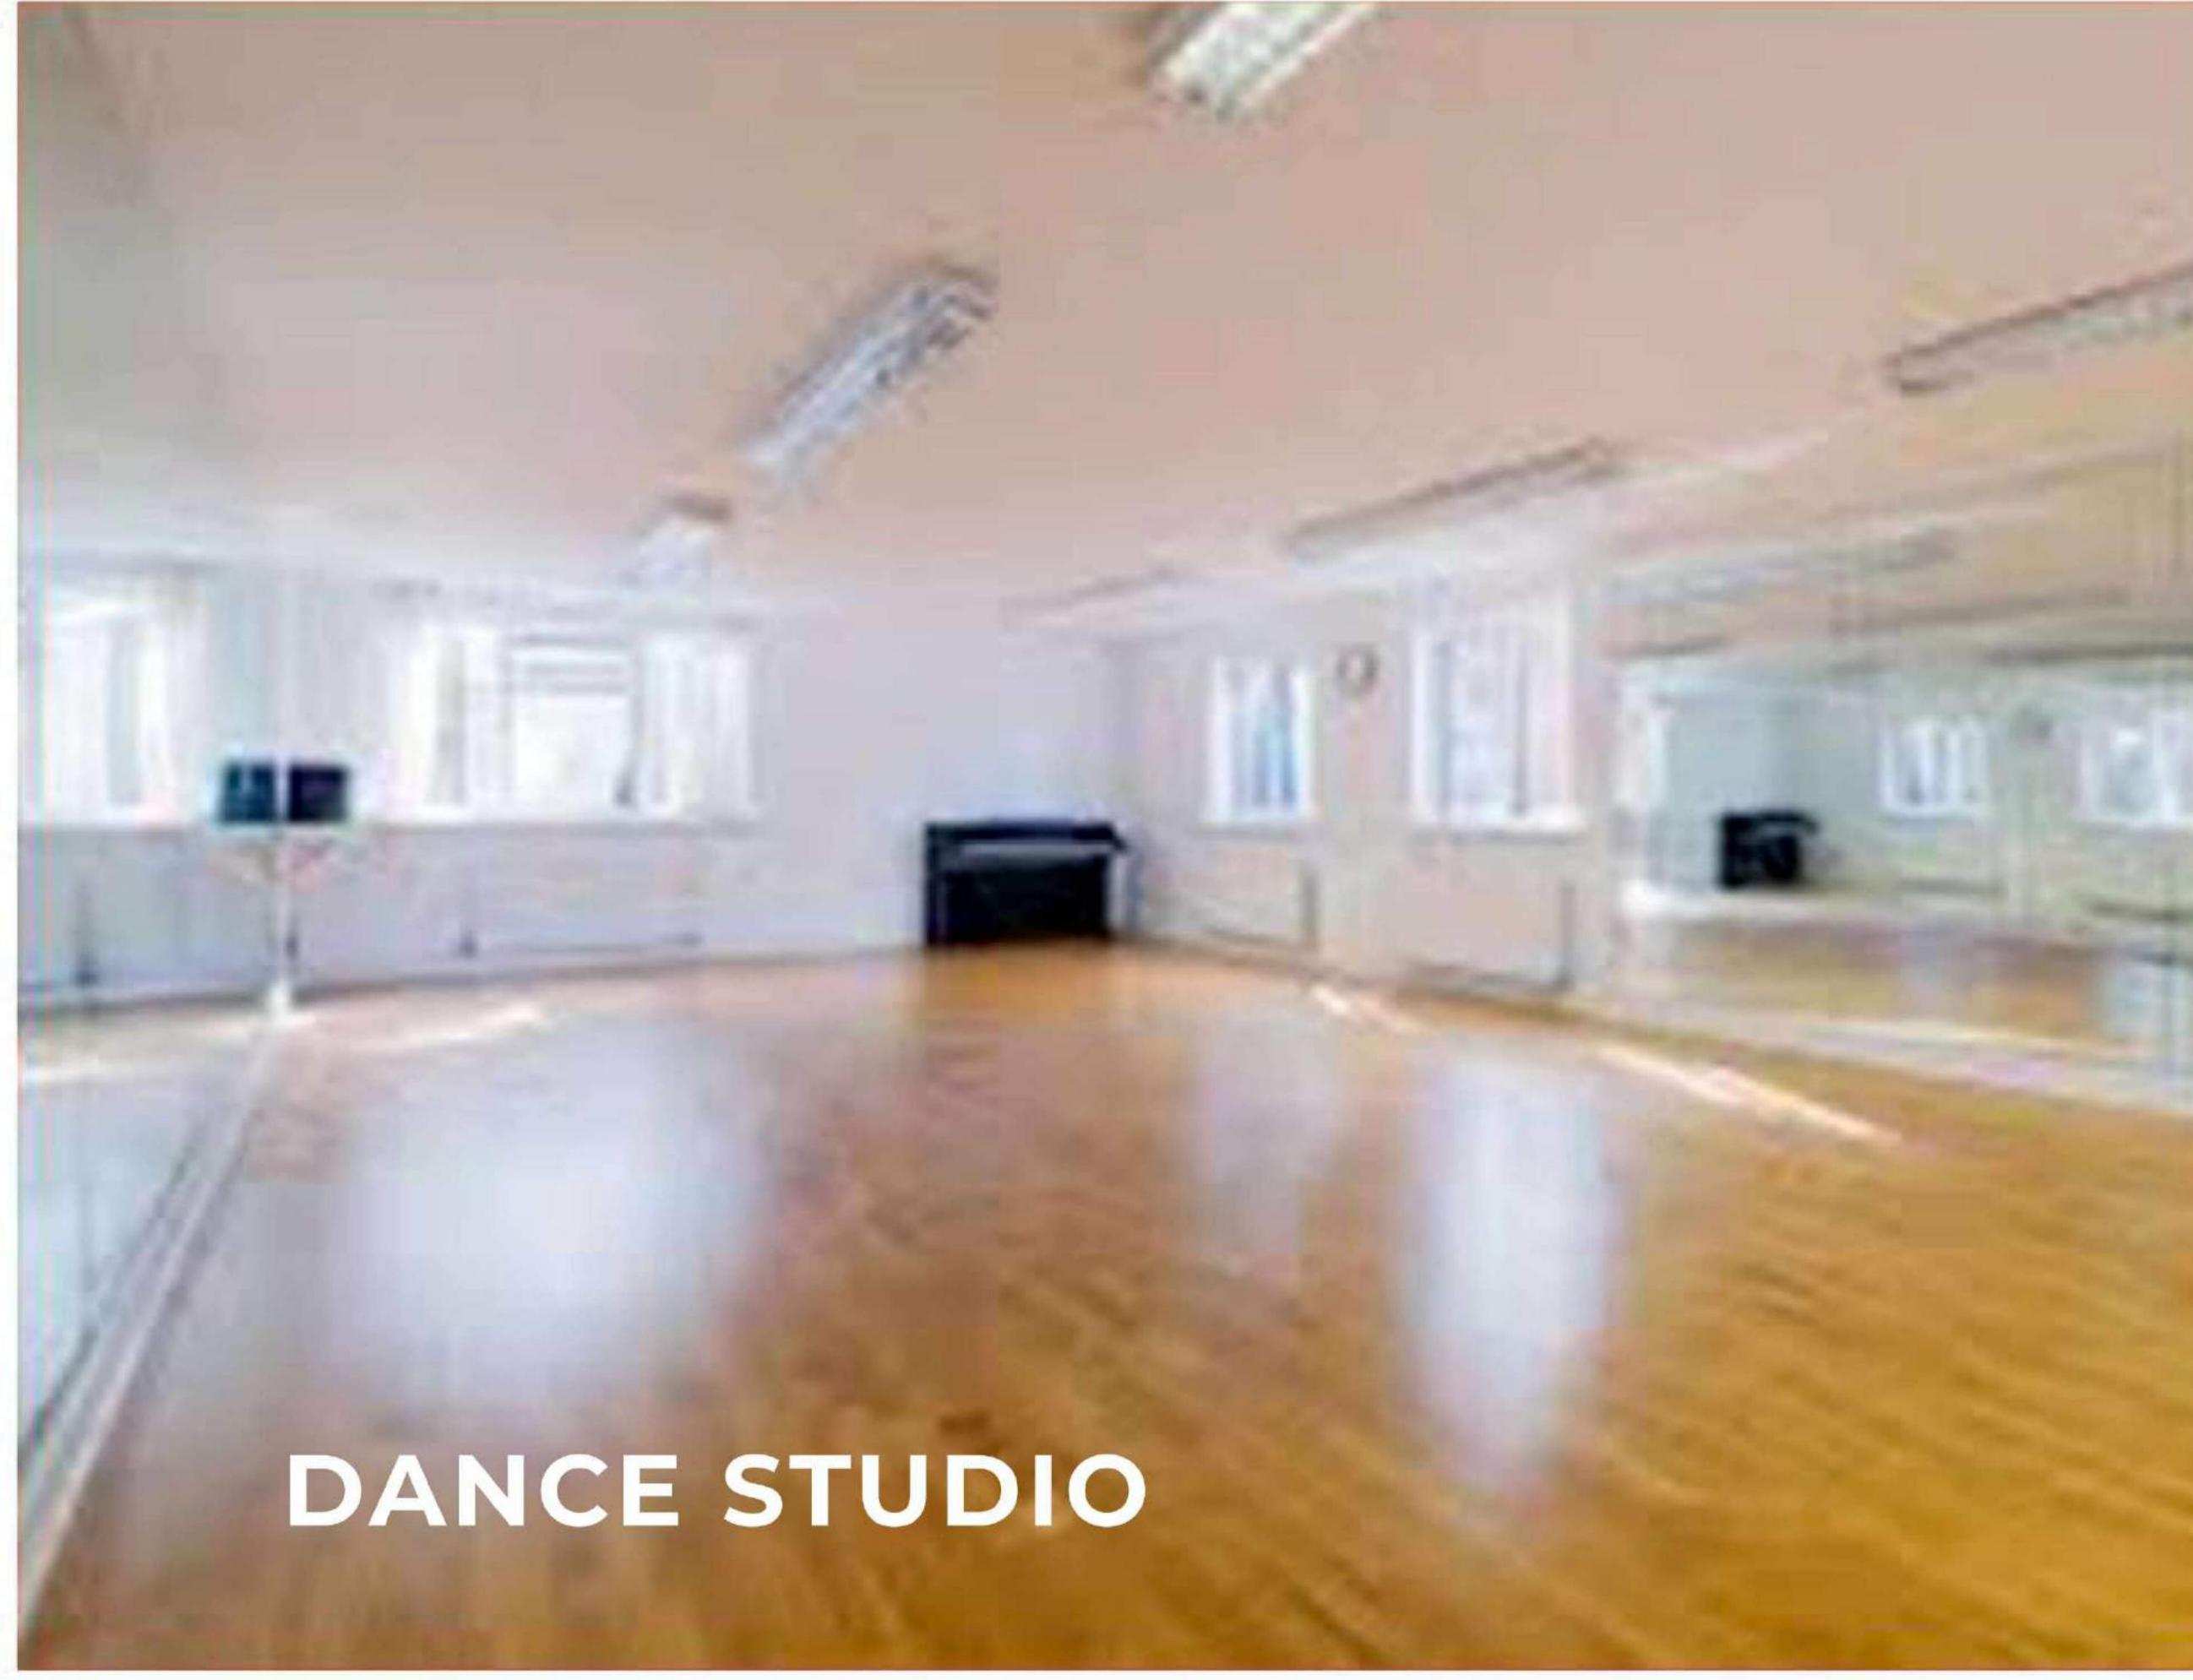

Transportation: Every bus and van has GPS tracking along with a seatbelt on each seat.
