LEARNING BY DISCOVERING

We at SCS believe that the essence of education is access to its process that every child at SCS becomes a confident, successful, responsible and a happy individual. Nothing has children for learning, for a future that's yet to unfold, as a responsibility that we owe to them...and to our nation!

The initial cognitive experiences that prompt such an active and happy learning for learning. Motor, domain, drama, communication and collaboration skills are important components of their learning experience. We follow 'Covey Curriculum' in Nursery and Kindergarten. Hence this curriculum came to foster development at the start.

A teacher at the young learner's automatic and an automatic development. During this 6 periods daily routine progression. Our holistic approach involves interdisciplinary learning which fosters students' autonomy, creativity and imagination.

The teachers use multiple learning strategies to help students retain information and enjoy their learning journey.

Learning at this stage is crucial phase of personal and intellectual development. It is a critical period - internally, socially, behaviourally and physically. Hence the focus is on guidance, supporting and mentoring. The aim is to instill the 21st century learning skills to ensure academic success and later innovation.

As students move into the final years of their schooling, we ensure they are guided, engaged and nurtured in a truly adult context through: Team- and individual-based tasks that emphasise self-ownership, learning, assessment and consistent striving. Their growing capacity is acknowledged through increased responsibility, in a challenging yet supportive environment.

Our focus is on providing students with a challenging but achievable learning experience. We ensure that all students are supported and encouraged to reach their full potential. We provide a range of opportunities for students to engage in extracurricular activities, including sports, music, and art. We also provide a range of support services to ensure that all students are able to succeed in their learning journey.

A diverse programme for our talented students promoting physical, personal, emotional and spiritual development. From the diverse that create talent, wisdom and strength, then with knowledge through experiential activities, life learning is their motto for that activity.

WIS has a comprehensive physical education programme that assists children in their learning. All this from an early age. The curriculum is supported by visiting events in various sports and games. Children love all games from playing football, cricket, basketball, hand ball and games. Other games such as chess, table tennis, badminton and tennis give students the skills to competitiveness in our children.

WIS has a dedicated Art Studio where our dear young children learn to art. They are encouraged to create their own drawings and craft work. Students take pride in being so creative and showcasing their art work on the walls of the school. All educational activities, exploring and creating artwork to share and for personal use is the scope of Art education in WIS.

Music lessons, drama activities and other things that we do, and allow the children to be creative and confident. Music is part of the structured curriculum and allows the children to participate in the school cultural events such as Western Music, Indian Music Shows, Street Performance Music and the Talent Show.

GitHub is a platform for software development that has become a central hub for developers to collaborate on projects. It provides a secure and reliable environment for code storage, version control, and collaboration. GitHub's open-source community has grown significantly, and it has become a key player in the software development ecosystem. GitHub's success is a testament to the power of open-source collaboration and the global software development community.

Ms. Richa Sharma

Principal, Raghav Global School

Change is imminent and we must adapt or face obsolescence. Human history has witnessed the largest disruption caused by the pandemic, dramatically affecting the education system also across the world. However online teaching- a panacea in the crisis - opened great opportunities to reinvent learning and assessment strategies. But how do we go beyond the first steps of change in education? How do we sustain momentum? Whether the pedagogy and curriculum, relevant today will prepare students to play a meaningful role over the next 25 years? We must rise to the challenges posed by several far-reaching trends in education, globally and in India, and bring about a transformation in human consciousness.

RGS is on a journey of creating a learning society for sustained and inclusive growth that builds human capital and fosters innovation. We are developing a thinking school, a crucible of critical creative thinking and active self-directed learning, where staff and students continuously challenge assumptions, ask good questions, learn from past experiences and study the best practices globally and adapt them locally to generate a climate that draws forth new attitudes, beliefs skills capabilities awareness and values. The aim is to thrive in a globalized world using 21 Century Skills.

I applaud the 'RGS Team' which is diligently inspiring children to the awareness of their 'true self' through knowledge.
